*Abstract*—Abstract text

*Index Terms*—Photovoltaic systems, forecasting, agriculture

## I. INTRODUCTION

Write a new introduction. Don't risk plagiarizing your previous paper.

The literature survey will be part of the introduction.

## II. PROPOSED METHOD

Describe the proposed method in detail. This is the most important part of the paper.

## III. DATA SOURCES

Describe where the data comes from for the work described.

## IV. IMPLEMENTATION

Some implementation details maybe can be copied from the other paper, but mostly this one should focus on the forecasting.

## V. RESULTS

Results will be presented in this section. Plots! Tables! Yay!

## VI. CONCLUSION

This is the conclusion section. It should be all new and focus on the additional forecasting work to do.

## ACKNOWLEDGMENT

This work is supported by the Scientific and Technological Research Council of Turkey (TUBITAK) under grant number 119N313.
